

Fifth  
International  
Conference

on

# DESIGN COMPUTING + COGNITION

# 12

Bringing artificial intelligence, cognitive science and  
computational theories to design research

<http://mason.gmu.edu/~jgero/conferences/dcc12/>

7-9 June 2012

preceded by workshops 5-6 June 2012  
Texas A&M University, College Station, Texas USA

**Call for Papers, Posters and Workshops**

Design is a fundamentally important topic in disciplines ranging from the more commonly associated fields of engineering, information technology and architecture, to emerging areas in the social sciences and life sciences. It is a key to economic competitiveness and the fundamental precursor to manufacturing, implementation or construction. This conference series aims to provide an international forum for the presentation and discussion of state-of-the-art and cutting edge research and developments in design computing and cognition.

**Original papers** are invited on all aspects of artificial intelligence, cognitive science, computational theories and advanced digital technologies applied to design research. Papers will be rigorously refereed by an international board of reviewers and accepted papers will be published as a book.

**Posters** describing ongoing research are invited. Abstracts outlining poster material will form the basis of refereeing. Authors of accepted posters will give a brief verbal presentation.

**Workshop proposals** that explore specific topics related to the conference, within a half-day format, are invited.

**Submission Timetable**

Paper abstracts due	1 December 2011
Full papers (20 page limit) due	6 January 2012
Poster abstracts due	3 February 2012
Workshop proposals due	3 February 2012

For further information and full submission details browse the conference website. If you have further questions please contact:
